

Claims

- [1] A stationery item having a two-sided stamp, comprising:
a cylindrical shape of reduced-diameter member 5 being provided on one end of the stationery item and having a pair of support cuts 7 formed at opposite positions and a pair of stopper cuts 11 disposed between the support cuts 7 and having an arc shape lower edge, respectively;
a stamp holder 6 provided with a pair of stamps 12a, 12b at upper and lower surfaces thereof, each stamp has a different pattern and is protruded beyond the reduced-diameter member 5 when the stamp holder 6 is set on the reduced-diameter member 5, and having protrusions 8 to be rotatably inserted into the respective support cuts 7 and a stopper 9 provided between the protrusions 8 to be positioned in the stopper cuts 11; and
a stamp cap 4 being locked to the reduced-diameter member 5 so as to cover the stamps 12a, 12b protruding from the reduced-diameter member 5.
- [2] The stationery item having the two-sided stamp according to claim 1, wherein the stationery item comprises a mechanical eraser stick 1, and the reduced-diameter member 5 is provided on an end of a push button 2 of the mechanical eraser stick 1.
- [3] The stationery item having the two-sided stamp according to claim 1, wherein the stationery item comprises a glue stick 20, and the reduced-diameter member 5 is provided on an end of a rotary grip 21 of the glue stick 20.
